

## REQUIREMENTS FOR DOING CONCRETE WORK IN PUBLIC RIGHT-OF-WAY

1. A permit must be obtained in advance of doing any work in the right-of-way. This includes removal of existing concrete.
2. Proper traffic control devices must be in place before doing any work that in any way disrupts traffic. Any questions regarding maintenance of traffic can be answered by the Transportation & Traffic Engineering Division, (513) 785-7290.
3. Flag persons must wear proper reflective safety vests, have proper flags and signs and must have training in flagging procedures.
4. All concrete must be Ohio Department of Transportation Class "C".
5. All forms must be inspected prior to placement of concrete. Call (513) 785-7280 four (4) hours in advance for inspection.
6. Within twenty-four (24) hours of removal of forms, soil areas must be backfilled and pavement areas must be backfilled with Item 304 Gravel (B-19). The contractor must maintain the gravel filled areas until the City arranges for a permanent asphalt repair.
